Zurn. The Real MVP In Facility Restrooms.

The Zurn team of flush valves, faucets and hand dryers is fast becoming every facility manager's answer for top performance in facility restrooms. Whether manual or automatic sensor equipment, facility managers are turning to Zurn to solve their restroom problems.

The Zurn AquaSense® line of automatic sensor products offers a full complement of "no-touch" automatic sensor equipment that addresses today's social concerns while assisting the facility manager with water conservation, ADA compliance and reduced maintenance.

The Zurn line of flush valves, faucets and hand dryers has also satisfied the public's desire for increased sanitation and user-friendly operation.

Zurn sensor flush valves and faucets are designed in both electronic and battery powered models. Battery models allow existing facilities to upgrade to today's building standards. Sensor products add to the prestige and enhance the general presentation of the building to its occupants.

Make Zurn the MVP in your facility restroom! **Call our toll free number 1-800-997-3876 to inquire about our 30 day free trial period for any one of our Zurn sensor products.**
