Another Reason To Take A Shine To ...

E-Z Flush

Keeping a sanitary presence in a commercial restroom is paramount when retrofitting or in new construction. Zurn E-Z Flush makes its greater presence known with the E-Z Flush CP and CPM.

Both the high impact-resistant, chrome-plated plastic of the E-Z Flush CP and the heavy, vandal-resistant chrome-plated metal of the E-Z Flush CPM offer the clean, sanitary look required of a sensor retrofit kit. And, unlike black retrofit kits, the E-Z Flush sensor also complements the aesthetics of the flush valves and other chrome-plated fittings in the restroom.

Our E-Z Flush makes updating your existing handle-operated flush valves a breeze. By simply removing the handle assembly and replacing it with the E-Z Flush retrofit kit, your restroom will have the latest technology and automatic sensor operation in a matter of minutes.

E-Z Flush gives you retrofit peace-of-mind along with these beneficial features:

- Actuator is not affected by harsh water or chlorimines
- Patented design for reduced maintenance
- Replaceable angled, tempered glass lens
- ADA compliance
- LED low battery indicators
- Increased water conservation
- Manual override button
- User-friendly operation
- Elimination of odors caused by unflushed fixtures
- Replace batteries without the need to turn off the water
