Water And Gas Safety Shut-Off Valve

Essential Equipment For Every Water Heater.

Secure protection against water heater leaks.

The WAGS Water And Gas Safety valve shuts off the water supply (plus gas supply for gas-fired water heaters) when it detects a water leak, preventing disastrous flooding and damage to structures and belongings. Your customers sleep easy at night, knowing that their floors, rugs, basements and property are safe and dry.

An easy sell.

All across America, homeowners are discovering the wisdom of having a WAGS Water And Gas Safety valve installed on their water heater. No matter the brand or how much the cost, the fact is, every water heater will eventually fail, usually within 7 to 10 years. Without a WAGS, a leaking tank keeps

refilling...and leaking. An undetected water heater leak can release hundreds, even thousands, of gallons of water. For the first time, you can offer a solution to a problem that effects over 5.5 million households every year.

An easy install for add-on profits.

WAGS can make you an extra 30-40% on every water heater you install, because your customers will pay extra for the peace of mind that comes with every WAGS. Adding a WAGS as part of any new water heater installation takes about 20 minutes. Retrofits are easy, too. Place a drip pan under the water heater or use the WAGS Water Heater Dam to speed installation on an existing water heater. Connect the cold water supply to the IN port of the WAGS valve, then connect the OUT port of the

“It’s an exceptional valve, great for any finished basement, for first floors, or in mobile homes.”

– Mark Robinson, Plumber

“The peace of mind is worth the added expense.”

– Dave Lynch, Homeowner

WAGS to the COLD IN on the water heater. If you're dealing with a gas-fired water heater, attach the included wiring harness between the WAGS and the gas valve. No electrician or gas technician is needed! It's so simple, we back it with the WAGS No Fault Installation Guarantee: if the WAGS activates during installation, we'll replace it FREE.

**NEW
WAGS WATER
HEATER
DAM!**

When leaking water reaches a depth of 3/4", a specially engineered fiber element dissolves to activate a spring-loaded piston that shuts off the water supply. The gas supply is also shut off if the valve is attached to a gas fired heater. Shown installed using the WAGS Water Heater Dam.

Proven technology, and Taco reliability.

As with all Taco products, you get the dependability, ease of installation and technical support that's made us famous. In the event of a water heater failure, WAGS springs into action using the proven

technology originally developed for the automatic inflation of life vests worn by military pilots. It's so dependable it even comes with a \$1,000 Lifetime Protection Policy.

The word's getting around.

The WAGS valve is the only product of its kind on the market that shuts off both the water and gas feeds when it detects a water leak. More and more homeowners, condo associations, and apartment building owners are asking for it by name. Not only that, state plumbing and gasfitter boards, inspectors, and professional organizations are recognizing the benefits of the WAGS valve.

A great new accessory.

The WAGS Water Heater Dam enables you to install WAGS on any water heater faster and more economically than ever, because now there's no need to drain or move the water heater to position a pan. Simply wrap the engineered foam Dam around the water heater, connect the two ends, and then secure the Dam to any type of flooring surface using the supplied adhesive. Every existing water heater should be retrofitted with a WAGS Valve and Dam combination.

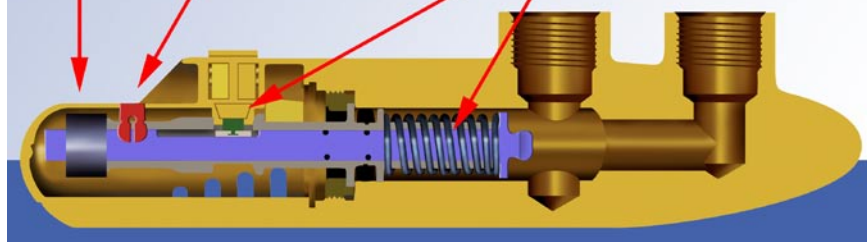

WAGS protects **both** the homeowner AND you! See product package for details.

NO FAULT
INSTALLATION

1. Patented fiber element dissolves in 3/4" of water.

2. Red flag pops up to tell you the WAGS has been fired.

3. The dissolved fiber element releases a spring loaded piston to shut off water and gas supply.

Become a Registered WAGS Installer!

Why not make an extra 30-40% per water heater installation? Sign up today! You'll receive a free merchandising kit loaded with consumer targeted sales tools, plus a WAGS ID Card for special deals and a free listing as a local Registered Installer on the official WAGS website!

We'll help you sell more WAGS.

We'll give you all the consumer sales support you need to move the WAGS valve out of your truck and onto the water heater, time after time:

- WAGS truck stickers and decals
- Consumer sales brochures
