

Taco® **D'MAND®** & Tankless Water Heaters SYSTEMS

IF YOU'RE GOING TANKLESS... GO D'MAND®.

Leading tankless water heater manufacturers now recommend use of their products with a quality on-demand water recirculation system like Taco's D'MAND® System. In fact, some of those manufacturers may reduce the warranty coverage period if their product is used with a conventional timer-controlled recirculation system. Conventional water recirculation systems fitted with temperature sensors and timers are not considered "on demand"...that's why choosing the Taco D'MAND® is always the right choice.

D'MAND® eliminates the need for a conventional recirculation system, and has been engineered to provide the head pressure needed to overcome the high pressure drops experienced with tankless water heaters.

With the Energy Star approved D'MAND® System, there are no standby losses, no stack losses, no need for extra storage tanks.

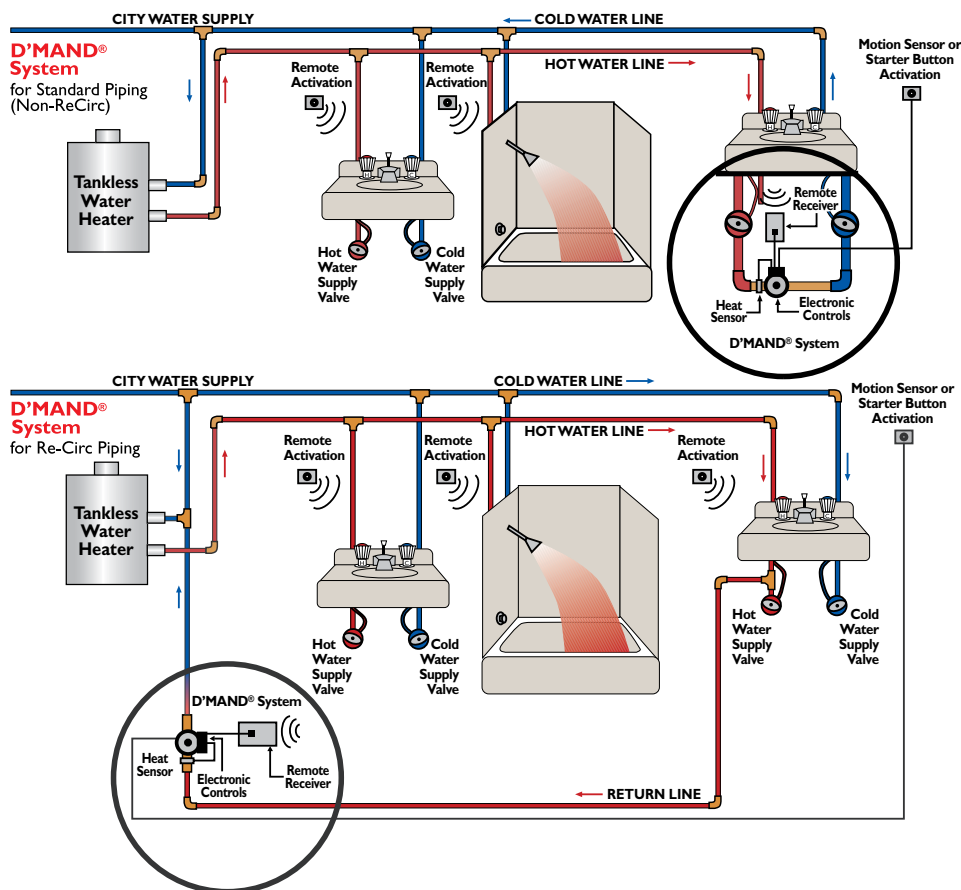

D'MAND® delivers instant hot water by push button or motion sensing – not by temperature sensor or a timer.

TACO'S D'MAND® SYSTEM IS THE PERFECT MATCH

Combining the D'MAND® System with a tankless water heater will save your customers energy dollars and preserve warranty longevity.

So if you're going tankless, go D'MAND®.

D'MAND® SYSTEM — On demand Water Recirculation System with Patented ACT D'Mand® Electronics Control Board					
Product Number	Connection Sizes	Motor			Ship Weight
		Voltage	RPM	HP	
008-DM	1/2" Male NPT	115/60/1	3250	1/25	10
008-DM-PK	1/2" Male NPT, with plumbing kit	115/60/1	3250	1/25	11
0011-DM	3/4" Shut-off Flange	115/60/1	3250	1/8	14
0011-DM-PK	3/4" Shut-off Flange, with plumbing kit	115/60/1	3250	1/8	15

D'MAND® SYSTEM — Accessories		
Product Number	Description	What it does
554-1	Remote transmitter, receiver kit	To start system with wireless remote control
