*American Standard*  
Style That Works Better

## STYLE MEETS SUBSTANCE

At American Standard, it all begins with our unmatched legacy of quality and innovation that has lasted for more than 130 years. It is this tradition of quality and innovation that puts us in three out of five homes in America, as well as, countless hotels, airports, and stadiums. We provide the style and performance that fit perfectly into life, wherever that may be.

We have a broad range of bath and kitchen products that are designed to marry style and function with innovative solutions, creating products that simply make life easier. Every product we make is designed to meet the unique needs of our consumers and trade partners all over the world.

At American Standard, innovation never stops, ingenuity never ceases, history never dates itself and needs never go unfulfilled.

## STYLE MEETS SUBSTANCE

*American Standard faucets are engineered to look beautiful and function flawlessly. Our exquisite designs offer innovative conveniences like pull-out spouts for the bath, easy-to-upgrade shower styles, peace-of-mind safety features, and simpler-than-ever installation and cleaning.*

*Worry-free, drip-free, and built to last, all our faucets are covered by our Limited Lifetime Warranty.*

- DRIP-FREE FOR LIFE\* Valving designed & tested to survive over one million on/off cycles without failure
- TARNISH, SCRATCH AND CORROSION RESISTANT PVD finishes last a lifetime\*
- SPEED CONNECT® DRAIN Never needs adjusting and seals tightly every time
- MAKE-OVER MADE EASY TRIMendous bathroom style flexibility
- SCALD PROTECTION Anti-scald safety stop and pressure balancing valves
- WATER CONSERVING Showers and bathroom sink faucets

## SUPERIOR ENGINEERING INSIDE AND OUT

Our Ceramic Disc Valves are maintenance-free, and provide a lifetime of smooth handle control, even in extreme temperature or hard water conditions. Our finishes are tarnish-, scratch- and corrosion-resistant, because we use a Physical Vapor Deposition (PVD) process to make the lustrous finish a part of the faucet, not an outside coating.

Lifetime  
Finish

Lifetime  
Valves

## SPEED CONNECT™ DRAINS

This ingenious drain design is an American Standard exclusive. It seals tightly every time, never needs adjustment and always remains at the perfect height.

## TRIMENDOUS FLEXIBILITY

One universal valve body with many decorative trim options allows you to change styles easily with TRIMendous flexibility. Update your bath without tearing into the wall by simply changing decorative trim.

Green Tea Trim

Moments Trim

Town Square Trim

Dazzle Trim

## SAFETY VALVES

Our Safety Stop Valves prevent accidental scalding by limiting the hot water temperature. Our Pressure Balancing Valves protect against sudden temperature changes in the shower. We've developed Thermostatic Valves that maintain a constant pre-set shower temperature even when the water pressure or temperature changes. These features help keep your loved ones safe... especially important for children.

## FAUCETS

TO FIT YOUR SINK AND YOUR STYLE

### 3 HOLES – 8" WIDESPREAD

Extra space makes dual-handle 8" spread faucets easy to clean. Plus, they look great on larger sinks, and often come with multiple handle designs so you can easily update your look.

### 3 HOLES – 4" CENTERSET AND MINISPREAD

If your sink or counter has 3 holes with a 4" spread, you have the following options: a dual-handle 4" mini-spread, a single-handle 4" centerset, a dual-handle 4" centerset, or a single-handle/single-hole faucet with a deck plate.

### SINGLE HOLE INSTALLATION

One hand can control both water temperature and volume with modern single-handle/single-hole faucets. Designed to complement natural countertop surfaces for a clean, contemporary look.

## CAST BRASS CONSTRUCTION

In order to produce faucets that are literally tougher than nails, we use cast brass construction. Our state-of-the-art manufacturing process allows us to consistently produce seamless, easy-to-clean faucets of the highest quality.

## WATER-EFFICIENT PRODUCTS

Water is essential to all life and freshwater makes up just 3% of the world's water supply. We are using the earth's fresh water faster than it can be naturally replenished. With American Standard products, you can conserve water and go green in style. American Standard faucets and showerheads deliver great performance and a clear conscience about saving water. Our FloWise® High Efficiency showerheads deliver a drenching spray with as little as 1.5 gallons per minute, saving up to 40% on water use. All of our bathroom faucets save 32% more water than conventional faucets. Look for the WaterSense label—your confirmation that the U.S. Environmental Protection Agency has certified the product's exceptional performance while reducing water use by 20% or more.

## LIMITED LIFETIME WARRANTY

We are so certain of the unmatched quality and performance of our faucets that we offer a Limited Lifetime Warranty against drips or leaks on every valve. American Standard also offers a Limited Lifetime Warranty against defects in materials or workmanship.

## FLOWISE®

### PUT A NEW SPIN ON WATER CONSERVATION

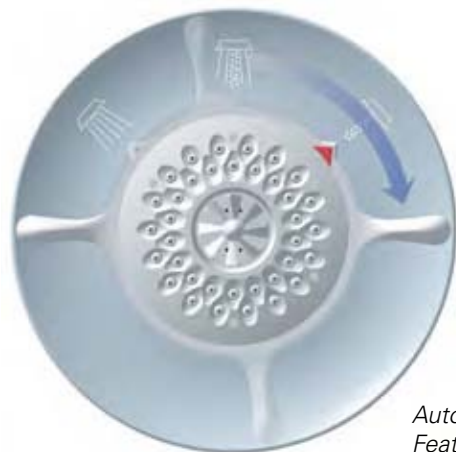

Our FloWise showerheads offer an invigorating shower experience that saves up to 40% on water usage. Our patented turbine technology spins the water into a spray that feels as great as a standard 2.5 gpm model while using less water.

*Turbine Technology*

### WATER SAVINGS MADE EASY

The 3-Function showerhead also offers a unique auto-return feature that always reverts to the maximum water-savings setting when the shower is turned off.

*Auto Return Feature*

# FLOWISE® SHOWERHEADS TURBINE TECHNOLOGY

## FLOW RATE: 1.5 GPM

- 40% water savings
- Exclusive turbine technology
- Single spray function
- Angle adjustable
- Maximum flow rate: 1.5 gpm.

### FLOW RATE: 1.5 GPM – 2.0 GPM

#### 3 WAYS TO ENJOY CONSERVING WATER

Our 3-Function showerhead lets you decide when and how much you want to save. Choose from three distinct shower experiences that conserve water and energy without sacrificing comfort.

FloWise is easy to use, our exclusive auto-return feature reverts back to the 1.5 gpm flow every time you turn the shower off. So you'll always start with maximum water savings—40% over industry standard 2.5 gpm. FloWise is designed to give you that luxurious shower you deserve and save money on your water bills.

- Water savings up to 40%
- Exclusive turbine technology
- Features 3 spray functions
- Exclusive auto-return feature
- 36 easy-clean nozzles
- Angle adjustable
- Maximum flow rate: 2.0 gpm

## A SINK JUST RIGHT FOR YOU

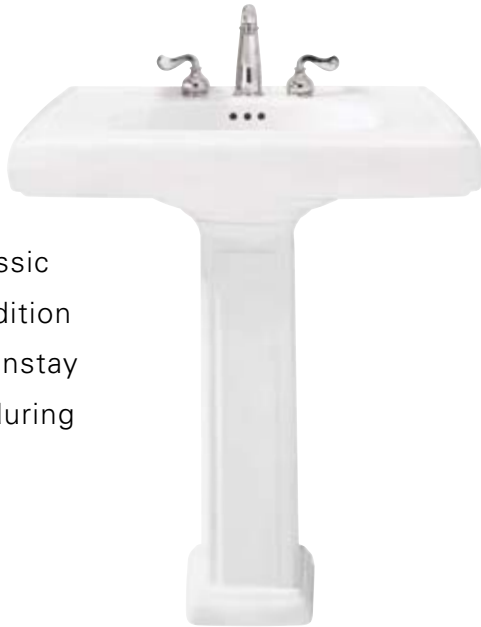

*Because bathroom sinks have to face a daily onslaught of hot and cold water, make-up, soaps, lotions, hairsprays, gels, mud masks, shaving cream, toothpaste, etcetera, we engineer ours to be as durable as they are attractive.*

*Our newest sink innovation is our EverClean® surface protection, which inhibits the growth of stain- and odor-causing bacteria, mold and mildew. The silver-based, double-coat surface provides a super smooth surface making it easier to keep clean. Select American Standard sinks have EverClean built right in so you can wipe away toothpaste, make-up, soap and lotions with ease, and without harsh and abrasive cleansers.*

*Since everybody's lifestyle—and sense of style—is different, we offer sinks in above-counter, wall-mount, pedestal, Right Height™ pedestal, countertop and undercounter models. Inside, there's sure to be a sink just right for you.*

## IT'S NOT NICE TO POKE

*The exclusive SmoothAir™ Massage System features full bubble immersion from perfectly smooth air jets placed throughout the tub floor. The result is beauty and comfort with no hard-to-clean "jet buttons". Featuring a variable speed blower with built-in heater and wave function, this system offers the ultimate in customizable relaxation.*

# WHIRLPOOLS... BEFORE YOU DIVE IN

Luxury Series whirlpools, air baths and combo massage systems from American Standard offer massage therapy options to satisfy any need, whether it's renewing aching muscles or soothing away the tensions of a hectic day. Available in a range of styles, sizes and shapes, it's easy to find the perfect model to complement any bathroom design.

## PREMIUM AIR BATHS

Get pampered with thousands of warm air bubbles. Indulge yourself with a refreshing and quiet massage.

- Exclusive SmoothAir™ Massage System
- Every air jet is flush with the bottom of the tub... Nothing uncomfortable to sit on... no hard-to-clean crevices
- Built-in heating system helps keeps your bath warm
- Thousands of tiny, warm air bubbles provide a constant, gentle massage that completely surrounds you
- Air blowers are whisper-quiet
- Select from a gentle to an invigorating massage with the touch of a button
- Air jets are self-draining and easy to clean

## HYDROMASSAGE SYSTEM I OR SYSTEM II... YOUR CHOICE

American Standard whirlpools come equipped with powerful factory-installed and -tested motors. Choose the system that best suits your needs.

### System I

- Single speed, powerful motors
- Reliable air activated on/off switch
- Silent air controls for jets

### System II

- Two speed motor
  - Low speed for relaxation
  - High speed for invigorating
- Electronic keypad controls motor speeds and features Pulse Action
- 20 minute countdown timer
- Silent air controls for jets

## CHROMATHERAPY IN-BATH LIGHTING

Each Chromatherapy Air Bath has two lights optimally positioned to flood the water with a relaxing glow, creating an indulgent spa retreat.

- Select from a range of underwater colors to match your mood. Or cycle through the color range
- System also remembers your favorite color
- LED lights will last for as long as you own your bath

**STANDARD DRAIN**

With a standard bath drain, the water in a bathtub can only rise as high as the overflow hole, leaving a lot of wasted space and chilly shoulders.

**DEEP SOAK BATHTUB DRAIN**

But the bathtub installed with the new Deep Soak Drain adds over two inches of water depth for a more luxurious bath, courtesy of a uniquely engineered overflow design.

**DEEP SOAK™ BATHTUB DRAIN**

- Unique overflow allows 2" deeper water level than standard bath drains for a more enjoyable experience
- Universal design works on most standard bath tubs
- Tap-actuated pop-up drain stopper
- ABC construction

**COLORS & FINISHES**

- |          |                    |

| • Chrome | • Linen            |
| • White  | • Satin            |
| • Arctic | • Polished Brass   |
| • Bone   | • Blackened Bronze |

*(Not recommended for whirlpools or air baths)*

**APRON PANELS**

For a finished look, style-matched removable apron panels are also available for many of our whirlpool models. Whether you need an apron or not depends on your specific type of installation.

**INTEGRAL APRON MODELS**

Thanks to their remarkable ease of installation, our Integral Apron whirlpools are always popular and their removable panel allows convenient access to the pump and motor.

**SAFETY FEATURES**

We put a great deal of effort into preventing slips and falls. From the StanSure™ anti-slip surfaces in our Americast® bathtubs to the grab bars available on most of our whirlpools.

**SAFE-T-HEATER**

Enjoy longer, more relaxing soaks by adding an optional heater.

**EVERCLEAN® SYSTEM**

American Standard whirlpools and air baths with EverClean incorporate a patented silver-ion additive right into circulation piping to protect the pipes from mold, mildew, algae and fungus that could cause deterioration or staining of the pipes.

**LIMITED LIFETIME WARRANTY**

All of our luxury whirlpools, air baths and bathtubs feature the industry's only Limited Lifetime Warranty with free, in-home service, so you can spend more time relaxing and less time worrying.

flat-mounted comfort jets  
or the soothing bubbles of  
the Air Bath. Make it just right.*

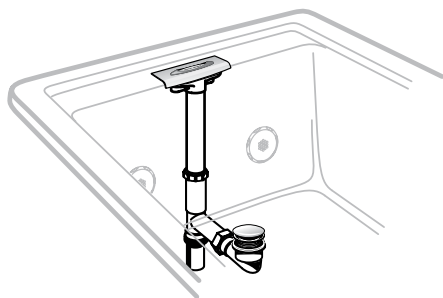

## COMFORT JETS

Our Comfort Jets are completely flush to the tub surface, and won't poke you anywhere. They're set at angles to circulate more water throughout the tub, to soothe your entire body. Select from a relaxing swirl to a more vigorous deep-tissue massage.

## AIR BATHS

Designed to excite the skin and soothe the mind, Evolution Air Baths will envelop you in a cascade of warm, comforting bubbles. Relax with a full body massage from air jets place strategically around the bath wall. Adjust the variable speeds to make your experience gentle or invigorating, or anywhere in between. The attractive chrome jets can be capped for a color-matched appearance.

## DEEP SOAK™ MAX BATH DRAIN

Our Deep Soak tubs are specially designed to work with our Deep Soak Max bath drain which provides 3" of additional water depth for a more luxurious soaking experience. It's low step-over height makes it easy to get in and out.

# AMERICAST®

American Standard improved traditional cast iron by developing Americast®... a remarkable alternative that's more durable, weighs half as much, and costs less to install. It even retains heat longer and emits less sound. Americast is American Standard's patented process that bonds a high-quality porcelain enamel surface with an enameling grade metal and a molded reinforcement material backing.

**Americast outperforms Cast Iron in Test After Test, Time After Time.** Extensive independent laboratory and actual field tests proved that Americast beats cast iron. Here's how:

## DAMAGE RESISTANCE

- *Direct impact* testing proved the Americast product's enameled surface to be equal to or better than the enamel surface of cast iron products.
- *Reverse impact* testing showed the Americast products had absolutely no damage to the enameled surface.

**LESS SOUND EMISSION** Sound emission testing indicated that Americast bathtubs are quieter when showering than cast iron bathtubs.

**SUPERIOR ENAMEL FINISH** Americast's smooth high-gloss porcelain enameled surface is the choice of specifiers.

**BETTER HEAT RETENTION** Testing proved that the Americast construction retains heat better than cast iron, for more comfortable bathing.

**EASIER TO INSTALL** Americast's lighter weight makes shipping, handling and installing easier.

**IMPROVED TILE EDGE SEAL** Americast bathtub's improved tile edge provides increased protection from water damage.

**AMERICAST MEETS CODE** Americast Bathtubs and Whirlpools conform to the strictest industry specifications including:

- ASTM F462 Slip Resistance
- ANSI Z 124.1 Ignition Test
- Acute Inhalation Toxicity of Thermal Degradation Products using NYS Modified Pittsburgh Protocol – Less toxic than baseline material or competitive product samples.
- Meets or exceeds American Standard's tough requirements for: wet and dry thermal shock, impact, sound emission, deflection, fatigue, and heat retention.
- All whirlpool models are UL listed as hydromassage units.

## PERFORMANCE COUNTS

CHAMPION® 4

CADET® 3

FLOWISE®

AQUAFORCE®

*Whether you have a full nest or an empty one, you need toilets that can keep up with the demands of your household. Since flushing requirements differ from home to home, and even from bathroom to bathroom, we offer you four distinct flushing systems to choose from.*

*More reasons to choose an American Standard toilet include our ergonomically designed Right Height™ options and Speed Connect® systems that install in one-third the time. Whatever your specific toilet needs are, we've got you covered.*

## CHAMPION® 4 FLUSHING SYSTEM

*Flushing systems just don't get any better than this. Our Champion 4 Flushing System features the industry's largest flush valve and trapway, producing a faster, more powerful (yet quieter) flush. You may never have to use a plunger again.*

### ENGINEERED TO PERFORM

This flushing system is engineered to do more and do it better. Not only does the Champion 4 Flushing System achieve the maximum MaP rating for bulk removal (1000g), but it also offers a surprising amount of water power—power that's fully realized due to the novel design of the toilet itself.

### MORE POWER IN

The larger valve opening (4") of the Champion 4 pushes water into the bowl three times faster than a standard 2" flush valve. That's also one-third faster than a 3-1/4" flush valve and almost twice as fast as a 3" flush valve.

### MORE VOLUME OUT

The wide-open, fully-glazed 2-3/8" trapway can move a 40% larger mass than a 2-1/8" trapway can, and an almost 70% larger mass than the industry-standard 2" trapway can.

\* For more information on our products and warranties, visit [www.americanstandard.com](http://www.americanstandard.com).

#### A INDUSTRY'S LARGEST FLUSH VALVE

The 4" Accelerator™ Flush Valve allows more water to enter the bowl faster for a more powerful flush. It helps keep the bowl clean and eliminates streaking.

#### B INDUSTRY'S LARGEST SIPHON TRAPWAY AT 2-3/8"

It's the industry's largest, fully-glazed siphon trapway.

#### C EVERCLEAN® SURFACE

This feature inhibits the growth of stain- and odor-causing bacteria, mold and mildew on the surface. The entire surface of tank and bowl are treated inside and outside.

#### 10-YEAR WORRY-FREE™ WARRANTY\*

Covers everything for residential and commercial installations, including china and tank trim, inside and out.

The Champion Slow Close Toilet Seat feature prevents lid slamming.

Its tool-free, lift-off design allows for easy and quick cleaning.

## SPEED CONNECT® SYSTEM

**Available on Champion® 4,  
Cadet 3®, AquaForce®,  
and FloWise® toilets.**

This innovative system cuts the typical toilet installation time by 30%, due in part to the innovative bolt design inspired by NASCAR engineers. Other features include:

- New one-piece nut-and-washer assembly
- Oversized tank bolts and grommets, preinstalled at the factory
- Tapered bolt ends enable quicker connection of nuts and washers
- Sloped bowl backsplash with four contact points for a solid tank-to-bowl connection; no more tank "rocking"

## EVERCLEAN® SURFACES

The toilets stay cleaner by repelling stains, dirt and grime.

**Our EverClean surface keeps toilet surfaces significantly cleaner inside the bowl and on the entire outer surface.**

Toilets that help keep themselves clean are no longer just wishful thinking. Because now, toilets featuring the Champion® 4 and Cadet 3® flushing systems are protected with our exclusive EverClean surface. The EverClean surface is a silver based, double-coat surface fired into the glaze which inhibits the growth of stain- and odor-causing bacteria, mold and mildew on the surface. The super-smooth, mirror-like surface is easier to keep clean, even after years of use.

### EVERCLEAN TOILET SEAT

Our new EverClean silver-based toilet seats repel dirt and grime by inhibiting the growth of stain and odor-causing bacteria, mold and mildew on the surface.

## CADET® 3 FLUSHING SYSTEM

*This system features a smarter design that delivers higher performance and fewer clogs—all at a great price. What's more, its easy-to-clean design makes it ideal for medium- to high-use bathrooms. And, both our new Compact Cadet 3 Right Height one-piece and two-piece elongated toilets will fit easily into a round front space, so you can have an elongated bowl in a smaller space without sacrificing comfort.*

The Cadet 3 EverClean® Slow-Close seat.

The lid features Finger-Lift access.

### A **EXTRA-WIDE 3" FLUSH VALVE**

The larger, chemical-resistant flush valve allows more water to enter the bowl faster, creating a cleaner flush. It won't warp or distort like ordinary flappers. The 3" opening allows water to flow into the bowl over 80% faster than a standard 2" flush valve.

### B **2-1/8" SIPHON TRAPWAY**

With a larger diameter than the industry standard, this fully glazed siphon trapway features no choke points and a 2" ball pass to help prevent clogging. It can move a 60% larger mass than a standard 2" trapway can.

### C **EVERCLEAN® SURFACE**

This feature inhibits the growth of stain- and odor-causing bacteria, mold and mildew on the surface. The entire surface of tank and bowl are treated inside and outside.

### **5-YEAR WARRANTY\***

Covers everything inside and out for total confidence.

Consolidated

Exclusive design  
features elongated  
bowl that fits in round  
front space. No  
sacrifice on comfort.

## AQUAFORCE® FLUSHING SYSTEM

*The AquaForce Flushing System reengineers how water is delivered and distributed in the bowl. Every curve and computer-designed jet accelerates the natural flow of water moving downhill – and does it quietly, without splashing. The advanced fluid dynamics of the siphon jet produces a strong, prolonged push that powers away wastes. The power of this jet permits a 2 inch diameter trapway, the same ball pass size that used to be standard on 3.5 gpf toilets.*

- A 2" FLUSH VALVE**  
Meters water flow for maximum swirl and jet function – without splashing.
- B COMPUTER DESIGNED RIM**  
Accelerates the natural spinning motion of water going down the drain.
- C LARGE WATER SURFACE**  
10" x 9" or larger water surface keeps bowl cleaner with fewer odors.
- D ADVANCED SIPHON JET DESIGN**  
Powers wastes through the fully glazed 2" ball pass trapway.
- E EZ FLOW 2" DIAMETER TRAPWAY**  
Engineered for optimum performance. Ball pass comparable to 3.5 GPF toilets. Fully glazed to smoothly pass waste.
- F SPEED CONNECT**  
Sanitary dam stabilizes the tank so only two (pre-installed) bolts are needed for sturdy bowl connection.
- G SANITARY DAM ON BOWL**  
Helps keep liquids from between tank and bowl – reduces odors, better hygiene.
- H PILOT FILL VALVE**  
Valve with integral float gives quick, reliable shut-off and very quiet refill.

## THE FLOWISE® FLUSHING SYSTEM

*This system delivers a forceful yet frugal flush that uses 20% less water than standard 1.6 gpf toilets, making it ideal for people who want to conserve water—and save money—with every flush.*

### THE WISE WAY TO CONSERVE

The FloWise Flushing System qualifies for the WaterSense<sup>SM</sup> label. WaterSense is a voluntary partnership program launched by the U.S. Environmental Protection Agency (EPA) to designated products and services that conserve water and perform as intended.

Choosing the FloWise System makes ecologic and economic sense. It can save a family of four up to 4,000 gallons of water per year while lowering water bills.

### DUAL FLUSH MODELS

The FloWise Dual Flush models feature a concealed trapway and smooth sided bowl. The push button (small and large) actuator on top of the tank gives the advantage of offering choice of either a low-water flush (0.8 gpf) for liquids, or a normal flush (1.6 gpf) for solids removal. The Dual Flush models carry a 2-Year Warranty.

#### A 4" FLUSH VALVE

A high-flow 4" Accelerator™ Flush Valve (same tank trim as the Champion® 4) pushes water into the bowl 3 times faster than a standard 2" flush valve, releasing the full 1.28 gallons in under one second.

#### B 2-1/8" SIPHON OUTLET

With a larger diameter than the industry standard, this fully glazed siphon outlet features no choke points and a 2" ball pass to help prevent clogging. It can move a 60% larger mass than a standard 2" outlet can.

#### C EVERCLEAN® SURFACE

This surface inhibits the growth of stain- and odor-causing bacteria, mold and mildew on the surface

#### 10-YEAR WORRY-FREE™ WARRANTY

Covers everything inside and out for residential and commercial installations. The Dual Flush models carry a 2-Year Warranty.

\* For more information on our products and warranties, visit [www.americanstandard.com](http://www.americanstandard.com).

## FLOWISE® WATERSENSE™

WaterSense™, a partnership program sponsored by the U.S. Environmental Protection Agency, makes it easy for Americans to save water and protect the environment.

Products that meet WaterSense criteria for water efficiency and performance carry a special label. When you use products bearing the WaterSense Label, you can expect exceptional performance, savings on your water bills, and assurance that you are saving water for future generations.

Switching to WaterSense labeled bathroom sink faucets or faucet accessories could save your family enough water annually to do 14 loads of laundry.

## CADET® 3 FLOWISE® FLUSHING SYSTEM 1.28 GALLONS PER FLUSH

*Cadet 3's smart gravity design delivers higher performance with fewer clogs—all at an affordable price. Engineered for a stronger, more reliable flush, the Cadet 3 Flushing System means you don't have to flush twice, yet each flush uses 20% less water than standard low consumption 1.6 gallons per flush toilets, saving you water and money with every flush.*

### **A EXTRA-WIDE 3" FLUSH VALVE**

The larger, chemical-resistant flush valve allows more water to enter the bowl faster, creating a cleaner flush. It won't warp or distort like ordinary flappers. The 3" opening allows water to flow into the bowl over 80% faster than a standard 2" flush valve.

### **B 2-1/8" SIPHON TRAPWAY**

With a larger diameter than the industry standard, this fully glazed siphon trapway features no choke points and a 2" ball pass to help prevent clogging. It can move a 60% larger mass than a standard 2" trapway can.

### **C EVERCLEAN® SURFACE**

This feature inhibits the growth of stain- and odor-causing bacteria, mold and mildew on the surface. The entire surface of tank and bowl are treated inside and outside.

### **5-YEAR WARRANTY\***

Covers everything inside and out for total confidence.
