

Your kitchen is the most used room in your house. No wonder it looks a little tired.

These days, kitchens are no longer just kitchens. Sure, it's still the room where meals are lovingly prepared to perfection, and occasionally burnt beyond recognition. But it's also where bills are paid. Breakfast, lunch or dinner is eaten on the run. Catering careers are launched by night. Unholy messes are made in the name of arts, crafts and scrapbooking. And of course, the kitchen is always where — go figure — far too many people congregate during parties.

At American Standard, we're all about designing kitchen sinks and faucets for the way you live today. Whether you actually cook dinner or microwave it, whether you have an empty nest or one that's full of toddlers and/or teenagers, we have smart, stylish and reliable solutions for your ever-evolving needs. After all, our kitchen ingenuity comes from spending lots of time, in lots and lots of kitchens.

american standard
product guide

Tear out the handy kitchen
checklist from the back
before you browse.

The cardinal rule of sink buying: Your lifestyle should dictate your sink style.

Naturally, some of the factors that will determine which sink you'll buy are style, size, price and configuration. But the most important factor is—you guessed it—your lifestyle. Are you more fashion conscious or budget conscious? Do you truly enjoy cooking, or merely endure it? How often do you entertain? Are you better at multi-tasking or single-tasking? As you page through this catalog, try to picture different American Standard sinks in your kitchen. Will one particular model make your life easier than another? Which accessories will make cooking a breeze, and which will make cleaning a snap? When you find the sink that best suits the way you live, as well as your home's décor, you'll know it. You just will.

sink design

BOWLS Wash a lot of baking pans? Try a larger, deeper single bowl sink on for size. Or divide and conquer with a dual-level sink featuring an oversized bowl and a smaller bowl for prep or cleanup.

OFFSET DRAINS Offset drains provide added flat space for stacking dishes and glasses, create more usable space under the sink, and allow water to drain even if a large pan or tray is soaking in the sink.

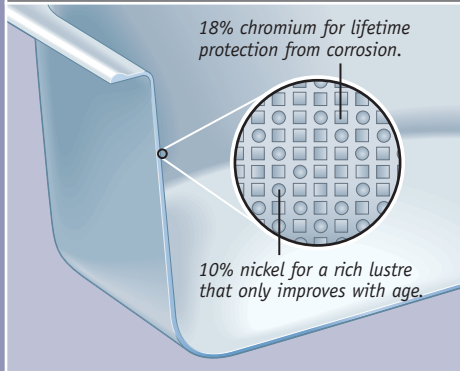

FAUCET HOLES The faucet you choose will dictate the number of holes you need in your sink. Choose your ideal faucet and then order the sink accordingly. Americast® sinks allow you to order the sink with any number of holes. See the product guide located on page 32 for faucet hole configurations.

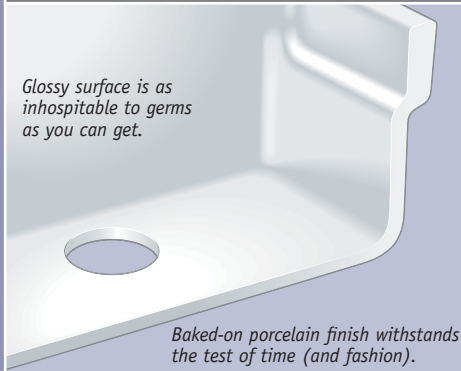

SINK ACCESSORIES Make your sink work harder for you with optional sink accessories. For example, our Culinaire® and Americast collections feature customized cutting boards, dish racks, colanders, remote access drains and more. Smart “tools” that can turn your sink into a workstation.

sink construction

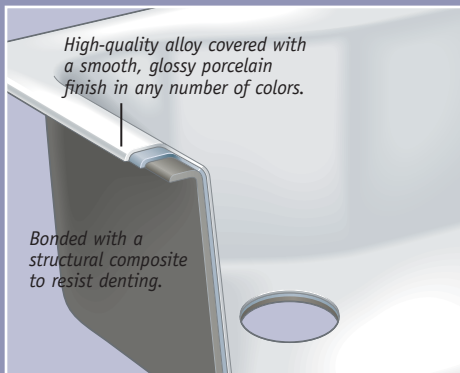

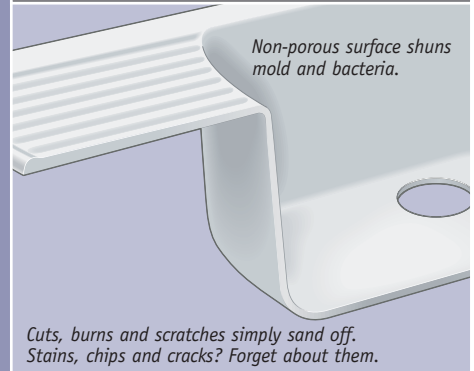

STAINLESS STEEL Industrial-strength appeal. 18-gauge, 18/10 American Standard stainless steel is resistant to dents, UV rays and germs.

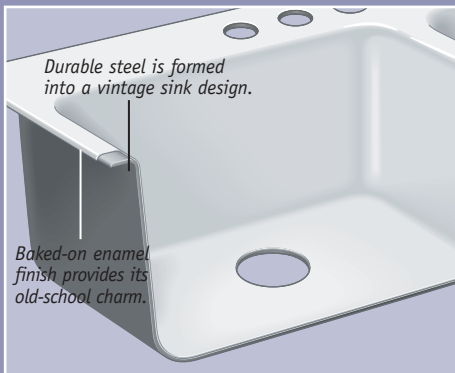

VITREOUS CHINA The word vitreous means “impervious to water.” We think “impervious to time” might be a better description.

CORIAN® Corian is synonymous with simple. Seamless, one-piece color and pattern through and through. So it won't wear away like laminates.

AMERICAST® Our original recipe. Thick as cast iron but half the weight. Heavy-duty without the heavy part.

ENAMELED STEEL We started with the fundamentals. But that's about as basic as it gets. An upgrade to a classic.

WARRANTIES The only thing more reliable than our sinks is our word. We back our stainless steel and Americast products with an equally durable Lifetime Limited Warranty. Corian comes with a 10-Year Limited Warranty. All other American Standard sinks are protected against manufacturing defects for one year.

sink installation

UNDERCOUNTER SINK Mounts directly to the underside of countertop material, making it easy to clean crumbs from the counter directly into the sink.

TILE-EDGE SINK Corners are squared off to more closely resemble countertop tiles. Mounts flush with tile and is sealed in with grout for easy cleanup.

SELF-RIMMING SINK “Drop-in” sinks are the easiest type to install. You simply drop one into a cutout in the countertop, and seal the perimeter with a watertight sealant.

The ideal kitchen faucet should fit your sink, complement your décor and reflect your personality. But not necessarily in that order.

If you're like most people, you're still using the faucet that was already in your kitchen when you moved in. You probably wouldn't have picked out that particular brand, model or color yourself. And you wouldn't mind swapping it out someday, for one that's better suited for the way you cook, clean and live. But hey, it's good enough for the time being. Plus, you can blame the previous owners for their lack of style. And you can blame the faucet's age for any dripping, chipping and tarnishing. But if you look through this catalog, see all that we have to offer, and still choose not to trade up to a genuine American Standard faucet, you'll have no one to blame but yourself.

SPOUT HEIGHT AND LENGTH Avoid a tiny faucet on a big, bold sink. Instead, give yourself plenty of space above the sink to fill large pots. Consider a Hi-Flow or Gooseneck faucet and make sure that it's long enough for the sink.

ONE HANDLE VS. TWO The choice is truly personal. With one handle, you enjoy convenient single-handed operation of water temperature and volume. Two handles afford you multiple spout and handle style options.

faucet design

PULL-OUT AND PULL-DOWN SPRAYS The faucet spray "head" can be pulled down or pulled out to extend your faucet and expand its versatility. Simplifies tedious kitchen tasks like cleaning sinks. And eliminates the need for a separate side spray.

FINISHES All American Standard finishes feature a Limited Lifetime Warranty against tarnishing, scratches and corrosion. Our finishes are actually integrated into the faucet. Not simply coated on. The result: high-class looks and low-maintenance performance for life.

HOLE CONFIGURATIONS Faucets can be mounted in a number of ways, determining the number of holes in your sink. For instance, single- and two-handle faucets work in three- and four-hole sinks. Adding a soap dispenser or vegetable sprayer? Consider a four- or five-hole sink.

faucet construction

BRASS CONSTRUCTION On the outside, American Standard faucets are elegant and sophisticated. Inside, they are hard-nosed solid brass. Seamless, one-piece, low-lead faucet bodies. Free of cracks or crevices so they're easy to clean. Tough enough to take whatever your pots dish out. Compliant with the Safe Drinking Water Act.

CERAMIC DISC VALVES Rubber washers simply weren't up to American Standard standards. So we created ceramic disc valves. They stay drip-free for life. Guaranteed. In fact, the more you use them the better they work. Giving you greater control over water temperature. And keeping handles operating smoothly—no sticking, no binding. Not ever.

LIMITED LIFETIME WARRANTY* At American Standard, we not only make faucets of the highest quality. We make good on our promises. We're talking about guaranteed form and function. That's why every one of our faucets is backed by a Limited Lifetime Warranty against drips and finish defects. Pure and simple.

*Extended to the original consumer purchaser.

faucet filtration

ClearTap.® Faucet and filter elope, live happily ever after.

ClearTap marries cutting-edge water filtration technology with innovative faucet design for cleaner, fresher water right from the tap. No filling up pitchers. No unsightly faucet attachment. Patented filter improves taste and eliminates odors. And reduces chlorine (98.9%), lead (99.3%) and waterborne cysts (99.99%) without removing beneficial fluoride. Plus, it's easy to install. Filter mounts either on or below the sink. Faucet mounts with or without deck plate and hand spray. Filter included.

EASY REPLACEMENT. Twist out the old and replace with the new.

EASY MONITORING. SmartElectronics™ tells you exactly when filter needs changing.

EASY ON THE EYE. Available finishes: Polished Chrome, White Heat, Bone and Satin.

ClearTap with Separate Spray 4665.000 (shown). Also available: ClearTap with Spray in Deck 4665.003.

stainless steel collection

CULINAIRE® COLLECTION

The world's most versatile food preparation workstation. As tricked out as sinks get.

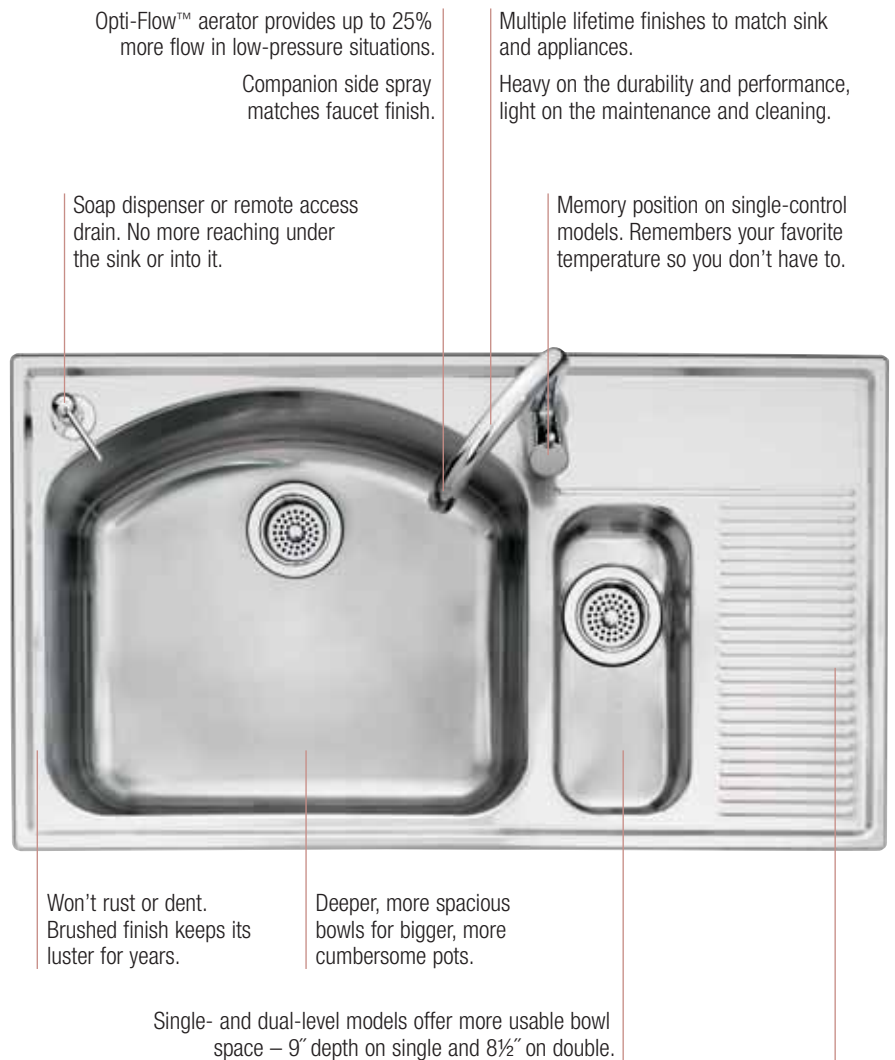

If multi-tasking had a poster child, this would be it. Culinaire from American Standard. Designed for those who aspire to do more in the kitchen. Available with all the extras. Like fully integrated cutting boards, dish racks, colanders, remote access drains. Plus a variety of equally collaborative Culinaire faucets. All customized to fit the sink like a glove.

Single Remote Access Drain 8780.010

Drain without the pain. No more sticking hands into who knows what. Simply pull knob to release drain. Dual drain also available.

vitreous china collection

COUNTRY SINK

Doesn't need lots of bells and whistles to get noticed.

Nothing resonates as loudly as character. A quality the American Standard Country Sink and its assembly of coordinated wall-mount faucets offer up in abundance. The finish on the faucets is guaranteed for life. Timeless also describes the vitreous china sink. Both are easy to clean and maintain. Be assured, dinner guests will find them hard to ignore for years to come.

shown:

Country Sink

9062.008

30L x 22W x 9½"D

Large bowl for stacking dishes. Pre-drilled faucet holes on ledge back. Shown in White Heat with Heritage® Faucet 7295.152 in Polished Chrome.

High backsplash keeps water in the sink and off of the counter. Pre-drilled for wall-mount faucet.

Integral soap dish keeps your favorite soap handy. Also available without dish.

Plentiful and durable. Spout styles and lengths: Brass 6", 8", 12" or Gooseneck.

Smooth-operating handles. Choices include metal or genuine porcelain lever.

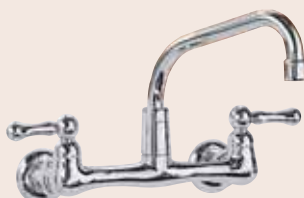

Low-maintenance, high-gloss vitreous china surface won't stain and resists bacteria.

Integral apron front gives large, deep single bowl its practical charm.

HERITAGE® FAUCETS

americast® collection

SILHOUETTE®, LAKELAND®
& CHANDLER™ COLLECTION

Easy on the back. Easy on the eyes.

Exclusive to American Standard, Americast boasts the strength of cast iron at half the weight. So installation is twice as easy. Plus Americast retains heat better than cast iron. It acts as a silencer for the garbage disposal, is available in colors that match kitchen appliances and faucets, and unlike rigid cast iron, allows for deeper, flatter sinks. Even more endearing when paired with an equally enduring American Standard faucet.

shown:

Silhouette 33" Double Bowl Sink

7145.804
33L x 22W x 9½"D

Also available with ivy or fruit pattern fired into porcelain surface.

left:

Undercounter installation shown in White Heat with Standard Collection Two-Handle Faucet 4251 in Polished Chrome.

right:

Countertop installation shown in White Heat with Heritage® Faucet 7230.000 in Polished Chrome.

Flexible installation – self rimming, tile-edge or undercounter.

Unique extended alcove accommodates everyday pot handles.

Multiple lifetime finishes match sink and appliances. Companion side sprays match faucet finish.

Memory position on single-control models. Remembers your favorite temperature so you don't have to. Multiple hole configurations. You name it, we drill it.

Offset drain leaves more cabinet space underneath the sink, more surface area for dishes.

Flatter bottoms, deeper bowls and straighter sides equal more room for chili pots.

Glossy, porcelain surface shuns stains and bacteria. A wide array of colors invites creativity.

Optional accessories make food preparation easier and more convenient.

Lakeland 33" Extra-Large Single Bowl Sink

7193.804
33L x 22W x 9½"D

Don't let its single-bowl appearance fool you. You're looking at a veritable workstation with an optional, removable second bowl. Now your sink can give you the extra-large capacity of a single-bowl sink plus the versatility of a double-bowl sink. Fits a standard 33L X 22W double-bowl cutout. Suitable for countertop or undercounter installation. Shown in White Heat with Lakeland Faucet 4114.001 in Polished Chrome.

**LAKELAND
ACCESSORIES**

Thanks to its insightfully designed, custom-fit accessories, the Lakeland sink truly adds up to more than the sum of its parts. The accessories nest and stack within each other—either inside or outside of the removable second bowl—so you can create multiple configurations as you multitask.

**Lakeland Removable Second
Bowl** 8193.300

This durable, portable bowl can be used in either side of the sink for food prep. With an exterior drain, it's also great for busing dishes and cleaning up.

Lakeland Accessory Kit
8193.400

Includes Dish Rack with two Utensil Holders, and Colander with retractable stainless steel handles. Both nest inside the removable second bowl.

**Lakeland Genuine Bamboo
Cutting Board** 8193.200

Features include a cutout handle that accommodates the utensil holder (included), a juice channel and adjustable feet.

Lakeland Bottom Sink Rack
8193.120

Cushions dishes and glassware, while protecting the sink from scratches and chips.

**Lakeland Under-Cabinet
Storage Rack** 8193.140

Attaches under the Lakeland sink for convenient, out-of-sight accessory storage.

Silhouette 33" Double Bowl Sink

7145.803
33L x 22W x 9½"D

Suitable for countertop or undercounter installation. Also available with ivy or fruit pattern fired into porcelain surface. Shown in Granite Green with Lakeland Pull-Out Faucet 4114.100 in Polished Chrome.

Experience and intuition have taught us how to craft sinks and faucets of the finest quality. They also tell us that low maintenance is not the same as no maintenance. Below are some tried-and-true cleaning tips to keep your American Standard sink and faucet looking and performing like new.

sinks

GOOD IDEAS

- Rinse after every use. Wipe the sink dry with a clean soft cloth to prevent water spots and mineral deposits.
- For general cleaning, use hot soapy water and liquid dishwashing detergents.
- Apply all cleaning products using a soft cloth or sponge only.
- Remove rubber mats when sink is not in use, as certain foods contain acids that when trapped can cause discoloration.

BAD IDEAS

- With the exception of Corian®, DO NOT use abrasive cleaners, cloths or paper towels.
- Do not leave household cleaning agents in your sink for a long period of time.

STAINLESS STEEL IDEAS

- We recommend regular cleaning. Use a mild liquid detergent and water to clean the sink after use. Rinse thoroughly and towel dry.

CORIAN IDEAS

- For difficult stains, use a green scouring pad.
- Disinfect surface with diluted household bleach (1 part water/1 part bleach).
- Enhance finish by applying a non-abrasive polish.
- Cuts and scratches can be removed with 400-grit sandpaper, restoring finish with a non-abrasive cleanser and a white scouring pad.

AMERICAST® IDEAS

- Rubber mats are acceptable, provided they are removed when sink is not in use, as certain foods contain acids that when trapped under the mat can cause discoloration.

faucets

GOOD IDEAS

- Wipe with a clean, soft, damp cloth and blot dry as often as possible.
- For general cleaning, use mild soapy water.
- To remove tough surface film and build-up, use any of the following: mild liquid detergents, clear liquid glass cleaners, non-acidic, non-abrasive gently liquid or fully dissolved powder cleansers mixed according to manufacturers' directions.

BAD IDEAS

- Avoid abrasive cleaners, cloths or paper towels.
- Do not use any cleaning agents containing acids, polish abrasives, or harsh cleaners or soaps.

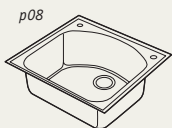

American Standard Product Guide.
More organized than Grandma's spice rack.

In the kitchen, everything has its place. The same principle applies to our Product Guide. Here, you can browse the complete lineup of American Standard sinks and faucets at a single glance. Including the important details needed to make a choice you can feel confident about. Plain and simple. Right at your fingertips. The way Grandma would've done it.
