FLOWISE™
WATER CONSERVING
SHOWERHEADS

DON'T GIVE UP A GREAT SHOWER TO SAVE WATER!

American Standard has innovative showerheads that save water, energy and money while delivering an enjoyable shower. Bathrooms account for 75% of indoor water use, and showers are the third largest source of water waste. A family of four can save 8,000 gallons of water a year with the FloWise showerhead. Couple that with a FloWise toilet, and the savings are more than 12,000 gallons a year. Water efficiency saves energy, too. By using less water you reduce the energy needed to maintain public water supplies. The savings hit home, as you use less hot water you save money on water and heating.

Our 2.0 gpm and 1.5 gpm showerheads use up to 40% less water than traditional 2.5 gpm models and all our showerheads are covered by a lifetime warranty on function and finish.* FloWise showerheads are perfect for LEED certified projects.

- **Feel good in the shower:** *our state-of-the-art showerheads deliver a drenching spray without wasting water*
- **Added comfort:** *adjustable showerheads let you customize the spray to your height and body position*
- **Save water, energy and money:** *great for LEED projects*

TURBINE TECHNOLOGY

An invigorating shower experience that uses up to 40% less water!

FloWise puts a new spin on water conservation. First, water becomes pressurized as it flows into a small chamber. Then the turbine (water wheel) spins the pressurized water adding to the force. Finally, the showerhead disperses the water evenly creating an energizing flow that feels refreshing while saving water, energy and money.

3 WAYS TO ENJOY CONSERVING WATER

Our 3-function showerhead lets you decide when and how much you want to save. Choose from three distinct shower experiences that conserve water and energy without sacrificing comfort. The fully adjustable spray angle adapts to your individual height and body position. FloWise is easy to use, our exclusive auto-return feature reverts back to the 1.5 gpm flow every time you turn the shower off. So you'll always start with maximum water savings — 40% over industry standard 2.5 gpm. FloWise is designed to give you that luxurious shower you deserve and save money on your water bills.

- **Choose your shower experience:** 3 spray patterns, ultra water saving 1.5 gpm, dual-stream wash and rinse 2.0 gpm, or wide-pattern invigorating spray 2.0 gpm
- **Added comfort:** adjustable showerheads let you customize the spray to your height and body position
- **Low maintenance:** easy-clean nozzles
- **Effortless efficiency:** unique auto-return feature reverts to ultra-saving 1.5 gpm when water is turned off
- **Save water, energy and money:** great for LEED projects

Auto-Return
Feature

WATER SAVINGS MADE EASY

How it works:

Water pressure keeps showerhead in selected mode while in use. Once water is turned off, pressure is released and a spring loaded mechanism automatically returns to ultra water saving mode.

CONSERVATION WITH STYLE

New FloWise showerheads are also available in four shower trim styles, all with a lifetime warranty on function and finish.
