Dear customers, business partners and friends:

I am tremendously proud and privileged to serve as G&G International's CEO. G&G has evolved from a small purchasing representative office to a company that provides various value-added procurement and marketing solutions. G&G embraces a strong foundation of commitment, integrity and excellence; and it is moving forward into a new era of growth and opportunity.

We are in the midst of a dynamic and rapidly changing business environment. Although the benefits of the changes are impossible to overestimate, there are other repercussions for businesses. Amid all the changes and challenges, no one can assume its market leadership is assured. So, how do you ensure that your organization efficiently utilizes the best methods and products across every phase of a project? How do you anticipate and deliver the next great products and services in the relentlessly changing markets?

To solve these problems and bring a solid performance and success, we will combine our strong industry knowledge, our international business expertise, and our continuous pursuit of your objectives with our creative and positive spirits. Moreover, it is our goal to embrace the changes and to be responsive and accountable to you as we strive to meet and even exceed your needs. As evidenced by the company’s mission, G&G is your business partner that you can trust and work with over the long run in this ever-changing business environment. This is our pledge to you and we will honor it.

Thank you for visiting our Website and let us know what we can do for you.
G&G International was founded in 1986 in Long Island City, New York, as a fully-owned subsidiary of Grant Supplies, one of the largest distributors of electrical and plumbing products in New York State. In 2000, looking to expand the business, the company was spun off from the parent company and relocated to Danbury, Connecticut to the current location.

G&G has grown from a small purchasing representative office to a company that provides engineering, procurement and construction management (EPCM) and various value-added marketing and international investment solutions. We serve a diverse set of contractors and suppliers worldwide and market products from more than 1,000 suppliers. We are also a primary service provider to South Korea’s Ministry of National Defense.

G&G has built an excellent reputation for maintaining the highest standards in servicing its customers and suppliers. Now G&G is a full service procurement, engineering and marketing solution provider, specializing in products and services aimed primarily at contractors, builders, government entities, industrial businesses and maintenance professionals.
**BUSINESS AREA**

Our business is aligned into four principal operating segments which are Procurement & Purchasing, Logistics, Marketing, and International Investment.

**Procurement & Purchasing**
G&G provides procurement services to large and small projects worldwide. We can independently support client procurement activities as a stand-alone service or work in concert with G&G’s engineering team as an integrated function. Our advanced sourcing methods and market intelligence help us obtain the best pricing, quality and service for our clients.

**Logistics**
Our logistics group develops, implements, and manages a transport and logistics program aimed at meeting the needs of large and small projects, assuring cost-advantaged solutions worldwide. G&G provides Complete Logistics Management for clients, including Logistics Planning, Cargo Projections,

Shipping Consolidation, Packaging Specifications, Storage and Warehousing, Over, Short, and Damaged Claims, Freight Bill Auditing. We provide our clients with One-stop Services from procurement to international shipping.

**Marketing / Investment**
G&G International operates as a Manufacturer’s Representative Agency, domestically and internationally. G&G’s Marketing Solutions serve the interest of both US manufacturers and foreign users. We have built a diverse supplier base through innovative efforts to drive mutual success among our clients, principals, and communities.

Leveraging its global presence, technical acumen, and transactional capabilities, G&G International is positioned to quickly respond to investment opportunities.
G&G continually seeks proactive business initiatives that expand the opportunities offered to suppliers. We are dedicated to structured growth through greater market penetration with our current principals and by assuming responsibility for carefully selected new principals.

❗Purchasing & Procurement

By leveraging our global project execution experience and technical expertise, we can lower overall procurement costs and shorten procurement cycle times. G&G’s advanced market knowledge base helps us confidently provide intelligent and timely recommendations regarding our clients’ procurement needs. Our rigorous analysis and selection process secures beneficial long-term agreements with the industry’s most advantaged suppliers.

G&G provides Supply Chain Management for clients, including:

- Strategic Sourcing
- Contract Management
- Commercial and Technical Commodity Expertise
- Global Market Knowledge
- Material Planning and Control
- Purchasing
- Expediting
- Logistics
- Export/Import Control
- Supplier Quality Surveillance
*Logistics Solutions*

Our logistics group develops, implements, and manages a transport and logistics program aimed at meeting the needs of large and small projects, assuring cost-advantaged solutions worldwide.

G&G provides Complete Supply Chain Management for clients, including:

- Logistics Planning
- Cargo Projections
- Shipping Consolidation
- Packaging Specifications
- Storage and Warehousing
- Over, Short, and Damaged Claims
- Freight Bill Auditing

We provide our clients with One-stop Services from procurement to international shipping.

*Marketing Solutions*

G&G International operates as a Manufacturer’s Representative Agency, domestically and internationally.

G&G’s Marketing Solutions serve the interest of both US manufacturers and foreign users. We have built a diverse supplier base through innovative efforts to drive mutual success among our clients, principals, and communities.

By establishing our own branches and managed operations, we achieve the control needed to maximize our market coverage. We regularly participate in exhibitions and conduct seminars for engineers and contractors to introduce new products and technology.

G&G’s Marketing Solutions provide a variety of sales and marketing support for both our manufacturers and our distributor channel partners including:

**Marketing Support**

- Sales Projection & Forecasting
- Business Planning
- Focused Market Research
- Focused Advertising Plan
- Promotion Participation
- Trade Show Participation

**Sales Support**

- Target Account Development
- Agency Account Management
- Technical Sales Support
- Sales Lead Management
- Product Sales Presentations

*Investment & Financing Solutions*

G&G Investment division is a provider of Investment & Project financing solutions. With extensive network of construction industry clients in overseas and commercial lending/investment experience with partners, our team offers unequalled service, accessibility, and professionalism to our clients.

G&G carries an extensive network of lending/financial resources by establishing strategic alliances with major and regional private investors, credit unions, insurance companies, private equity, venture capital and private investors.

In today’s challenging global marketplace, clients require a committed professional financing intermediary who truly understands their needs and offers prudent advice.

G&G offers comprehensive solutions to commercial financing needs that are often unavailable to banks or traditional commercial channels.

Our team has the experience and access to funding to successfully analyze and fund your project. We can cater to your unique circumstances and structure financing very creatively based on assets, experience, projections, and the unique aspects to your project. With our relationships with our capital partners, our funding capacity is virtually limitless.

Whether your project is $5 million dollars or a $1 Billion dollars we have the resources to properly structure and fund your deal.

If you meet with following Five’s and need project financing, please email to matt@ggitc.com for further discussion.

1. Strong management team
2. Significant growth potential
3. Ability to create value
4. Ability to generate cash
5. A clearly defined exit strategy
Mechanical

Ventilation Fans

Ventilation is the process of “changing” or “replacing” air in any space to control temperature or remove moisture, odors, smoke, heat, dust, airborne bacteria and/or carbon dioxide, and to replenish oxygen. Ventilation includes both the exchange of air with the outside as well as circulation of air within the building. It is one of the most important factors for maintaining acceptable indoor air quality in buildings. The ventilation fans are fundamental to HVAC system. Build to application can be supplied in a timely fashion from Roof mounted fans to Wall mounted fans.

Our partners are leading manufacturer of ventilation equipment for the world wide market.

- Exhaust Fans
- Supply Fans
- Power Ventilators for Smoke Control
- Explosion Proof Fans
- Laboratory Exhaust Systems
- Energy Recovery Ventilators (ERV)
- Air Curtains
- Industrial Blowers

Loren Cook, Nuaire, Penn Barry, Wolter

- Centrifugal Roof and Wall Exhausters

- Ceiling, Wall & Inline Fans

- Inline Centrifugal Duct Blowers

- Inline Blowers
Mechanical

Ventilation Fans

- Roof Mounted Blowers
- Centrifugal Vent Sets
- Tube Axial Fans
- Propeller Wall Fans
- Propeller Inline Fans
- Propeller Upblast Fans
- Industrial Material Handlers
Mechanical

Ventilation Fans

- Air Curtain
- Laboratory Exhaust
- Flat Blade & Airfoil Centrifugal Blowers
- Gravity Ventilators
- Energy Recovery Ventilators (ERV)
Commercial grade air filters are manufactured as both a small stand alone unit and as large units that can be affixed to an Air Handling unit (AHU) or to an HVAC unit found in the medical, industrial, and commercial industries.

- Sand separation units (S.S.U)
- IAQ air filters
- Inertial sand filters
- Oil bath filters
- Carbon filters
- Military & civil defense filtration system
- Fuel filters

**Mechanical**

**Humidity Control**

For buildings with a forced-air furnace, a humidifier may be built right into a furnace. Humidified air can protect wooden objects, other sensitive furnishings and equipments which may be damaged by overly-dry air.

In colder months, humidifiers provide substantial energy savings as occupants feel warm at a lower temperature with humidified air.

The Humidifier mounted in an HVAC system and can be controlled remotely via BMS or locally via humidity sensor.

- Electric Humidifier
- Steam Humidifier

**Electric duct Heaters**

Mounted inline in an HVAC system. These heat air as it passes over an electrically heat coil can be actuated remotely via BMS or locally via temperature sensor.

Our partners are long established leader in the design and manufacture of electric comfort heating equipment and controls aimed at the commercial, industrial marketplace.

Our partner’s heating products are custom-designed based on exact specification and must endure stringent quality control testing.

- Open coil Duct Heaters
- Finned Tube Duct Heaters
- Cabinet Heaters
- Unit Heaters
- Explosion Proof Heaters
- Immersion Heaters
Lunor provides security technology for shelters and hardened building which exceed the level of civil protection components. Individual solutions for all kinds of industry, petro-chemistry and the line of energy extraction belong to the core business of Lunor. Wherever people and material need increased protection, Lunor develops the solution.

Lunor blast valves allow a secure air exchange and protect personal and material against sudden blast. The valves close within milliseconds after the appearance of the blast valves are available with different air-flow rates and can be arranged in the wall frame according to your demands.

- Shelter Equipments
- Blast Protection valves
- NBC Filters
- Blast Doors
Mechanical

Auto Roof Ventilation System (ARV)

Western Canwell brings you expertly engineered equipment with over 100 combined years of experience. Western Ventilators have been continuously produced since 1927. Western Gravity Ventilators have been used worldwide in the mining and metals industry, in manufacturing, electrical generating facilities, as well as many other heavy intensive operations. Western Heat and smoke ventilators and Explosion Relief Ventilators have also been used worldwide in operations ranging from auto mobile assembly to warehousing. Over the history of the company, numerous patents have been obtained including fire head and smoke ventilators, Thermo flows gravity ventilators, and ridge Pac gravity Ventilators.
- Automatic Fire and Smoke Relief
- Continuous Ridge Ventilator
- Heat and smoke vent
- Thermo flow

Air Terminals & Dampers

Air terminal units are small air handlers designed for local use and may only include an air filter, coil, and blower. These simple terminal units are called “blower coils” or “fan-coil unit.”

Make-up air units are larger air terminals that condition 100 percent outside air (and no re-circulated air). Air handlers designed for outdoor use, typically mounted on rooftops, is known as a “packaged unit” (PU) or “rooftop unit” (RTU). 100 percent outside air conditions no circulated air.

The damper is a valve or plate that stops regulating the flow of air inside a duct. VAV box. Vents with motor-driven louvers can be actuated electronically or via pressure valve. Available in many sizes and configurations.

A damper (also known as a Volume Control Damper or VCD) is a specific type of damper used to control the flow of air in an HVAC heating or cooling system. In order to improve efficiency and occupant comfort, HVAC systems are commonly divided up into multiple zones. Zone dampers are used in most HVAC systems and are usually electrically powered. In large commercial installations, vacuum or compressed air may be used instead. In either case, the motor is usually connected to the damper via a mechanical coupling.
- Commercial & Industrial control dampers
- UL list fire, smoke and combination dampers
- Diffusers and Louvers
- CAV and VAV boxes
- Explosion proof dampers

Safe Air Dowco, Krueger, Meta AIR, Ruskin
**Plumbing**

**Storage & Expansion Tank**

Storage tanks accumulate and store collected matter. The size of an expansion tank depends on the system pressure, collector area, system volume, and static height of the system.

- Plain Steel Expansion Tanks
- Bladder Expansion Tanks
- Diaphragm Expansion Tanks
- Chilled Water Buffers
- Thermal Absorbers
- Chemical Feeders
- Air Separators
- Suction Diffusers
- Flex Connectors

**Valves**

Valves may be operated manually, either by a hand wheel, lever or pedal. Valves may also be automatic, driven by changes in pressure, temperature or flow. These changes may act upon a diaphragm or a piston which in turn activates the valve. Examples of this type of valve found commonly are safety valves fitted in to hot water systems or steam boilers.

- Ductile Iron Valves
- Cast Iron Valves
- Stainless Steel Valves
- Regulating Valves
- Strainers
Plumbing

Sanitary Ware

Our partners are leading manufacturers of quality engineered plumbing and drainage products in the residential and non-residential construction industry. All products are designed for adaptability, conformance to codes, ease of installation, and maximum performance efficiency.

- Sink
- Basin / Bathtub
- Urinal
- Water Closet
- Faucets
- Water Cooler / Drinking Fountain

Images

Water Heaters

Water heater is a thermodynamic process using an energy source to heat water above its initial temperature. Typical domestic uses of hot water are for cooking, cleaning, bathing, and space heating. In industry, both hot water and water heated to steam have many uses.

- Electrical Hot Water Heaters
- Steam Hot Water Heaters
- Hot Water Boilers

Manufacturer(s)
Hubbell, A.O. Smith, Lochinvar
A pump is a device used to move fluids, such as liquids, gases or slurries. A pump displaces a volume by physical or mechanical action. Pumps fall into three major groups: direct lift, displacement, and gravity pumps. Their names describe the method for moving a fluid.

- Chilled Water Pumps
- Hot Water Circulation Pumps
- Submersible Pumps
- Fire Pumps

Pipes & Fittings

Depending on the applicable standard to which it is manufactured, pipe is generally specified by a nominal diameter with a constant outside diameter (OD) and a schedule that defines the thickness. Tube is most often specified by the OD and wall thickness, but may be specified by any two of OD, inside diameter (ID), and wall thickness. Pipe is generally manufactured to one of several international and national industrial standards. Fittings are also used to split or join a number of pipes together, and for other purposes. A broad variety of standardized pipe fittings are available; they are generally broken down into either a tee, elbow, a branch, a reducer/enlarger, or a "Y."
Fire Protection System

Firefighting Suppression Systems

Fire suppression systems are used in conjunction with smoke detectors and fire alarm systems to improve and increase public safety. Suppression systems are governed by the codes under the NFPA 13 handbook.

- Sprinklers
- Cabinets
- Smoke Detectors
- Fire alarm systems
- Fire Hydrants
- Fire Valves
- Control Box
- Fire Hose / Reels
- Fire Extinguishers

Guardian, Mueller, Nibco, Tyco, Reliable, Croker
G&G International is registered with the US Directorate of Defense Trade Controls (DDTC) as an exporter for defense trade controlled articles (defined on the United States Munitions List - Part 121 of the ITAR). Today G&G is a recognized expert in military drawings and specifications for various vehicles and aircrafts. With our extensive database, we have the capability to locate almost any products in the US and world military markets.

We have long experience in peace shield projects, supplying parts and system to Pennesma, Hughes aircrafts, Kollisman Zahran O&M and Al-Raha Group Technical Services (RGTS). We are also a primary service provider to South Korea’s Ministry of National Defense.

P/A System  D-Logixs, Leader of Digital PA & AV System

Worldwide Leading Company:

Since its establishment in 1988, D-Logixs has developed itself into an enterprise in the public address system industry. D-Logixs has introduced IC Drive and Module for digital amplifier. Now, D-Logixs is going to spread out products to power amplifier for public address field in the world.

- P/A Systems
- Digital Power Amplifiers
- P/A Speakers

G&G international is Exclusive distributor for Worldwide Market.

SOFTWARE FOR DIGITAL PUBLIC ADDRESS SYSTEM

Our software can control digital public address system totally, is supporting overall operating system function with touch screen through screen monitor. Moreover this is visually showing its status for easily understanding to system operator and can control complicated system with a screen totally.

- Digital Public Address Operating System with easy touch screen control on fancy graphic display
- Broadcast each floor and entire building, BGM, recorded and advanced broadcasting.
- Automatically controls Emergency Broadcasting and display screen change in case of fire alarm.
- TTS Volume & Mixer control for CD, DECK, TUNER
- Broadcasts detail confirmation with recorded unit display monthly and annually.
- Remote LAN Control using Network System (Option)
